

Aerospace & Defense

With a history of pioneering space, a unique concentration of military bases and commands, and a vision to become the nation's epicenter for National Security Space, Colorado Springs has attracted many of the world's largest defense and commercial aerospace companies while being a catalyst for homegrown businesses.

The Pikes Peak region, encompassing a diverse and vibrant military presence, is home to five military installations and the operations of the North American Aerospace Defense Command, U.S. Northern Command, Joint Force Space Component Command, Air Force Space Command, U.S. Army Space and Missile Defense Command/Army Strategic Command, Missile Defense Integration and Operations Center, U.S. Air Force Academy, 4th Infantry Division, and 10th Special Forces Group. Their missions range from training and educating tomorrow's Air Force leaders and space professionals to fighting the global war on terrorism, while maintaining vigilance for homeland defense and security.

The aerospace, aviation and defense industry is the region's leading economic engine, accounting for 44 percent of the Colorado Springs economy with more than 111,000 employed in the industry and an annual economic impact of more than \$7 billion. As the military presence in Colorado Springs has grown, so too has the number of aerospace, defense, information technology, cybersecurity, data networking/storage, and software companies. With a dedicated and skilled workforce, university engineering and research support, a vibrant innovation culture, and a community that truly embraces the military, aerospace, and defense, Colorado Springs is the ideal location to relocate or expand your business.
